

What can you make with a square?

The perfect square can make itself into many different things!

When it was torn into scraps, the square made itself into a garden.

Cut out this square and tear it into scraps. What can you make with the pieces?

Tear Me!

What can you make with a square?

When it was shattered, the square made itself into a bridge.

Cut out this square and cut it into shards, so it looks as though it was shattered.
What can you make with the pieces?

What can you make with a square?

When it was snipped into ribbons, the square made itself into a river.

Cut out this square and snip it into ribbons. What can you make with the pieces?
