Once I open them, I store the bubble wands in an empty rice container since they sometimes leak if laid down flat. I use this larger symbol to label the container.

Got these on clearance for \$1.00 per pack of 6 (usually \$3.88 per pack) on Sunday at the Walmart Neighborhood Market at 36th Ave NW and Rock Creek Road in Norman, OK.

I cut these symbols apart, laminate & then cut again and store on a small section of plastic file folder in the container. That way the symbols are always with the bubble set to used for Aided Language Stimulation or for the child to request or comment via PECS. Of course if a child has their own PECS book or AAC device, I make sure they have this vocabulary within it.
